RE: Site Inspection, Geneva Rock Mining Company, Levan Project, M/023/016, Juab County, Utah

Date of Inspection: May 11, 2000
Time of Inspection: 9:30-11:30 AM
Conditions: Sunny and Cold
Participants: Wayne Hedberg, Tony Gallegos, Tom Munson, Lynn Kunzler, DOGM;
Tony Christofferson and John Child, Geneva Rock; and Will Wilson of the US Forest Service.

Purpose of Inspection: To determine the five acre boundary from which the operator can operate the gypsum quarry prior to permitting a Large Mine.

We arrived onsite and were greeted by Jack Dansie and shortly thereafter by John Childs, Tony Christofferson of Geneva Rock and Will Wilson of the US Forest Service. We explained the purpose of our visit to determine the five acre boundary, then both vehicles proceeded to drive to the top of the hill where the quarry is located. Geneva Rock marked out an area they felt they did not want to disturb. Lynn Kunzler GPS'd the entire upper disturbance. We indentified the fact, that they would continue mining in the same location but move downward.

We continued down the road and marked out the lower disturbance which included a storage pad for large boulders, a crushing facility, and a large lower storage pad. They stated that they only wanted half of the lower pad and they marked this area off. Geneva stated they would come back and install metal t-posts to document the boundary of disturbance and areas they would not touch until the large mine plan is approved.

During the inspection we were given digitized surveys of the site. The Division stated they would get back to the operator regarding acreage, etc. as soon as we could download the data.
